

AESTUVER Intumescent Strip

Product description:

AESTUVER intumescent strip (self-adhesive on one side) is a fibreless intumescent material with a graphite base and a high expansion capability.

The material expands three-dimensionally in the event of a fire and provides a seal in gaps, joints and other openings.

Field of application:

AESTUVER intumescent strip is suitable for the following applications:

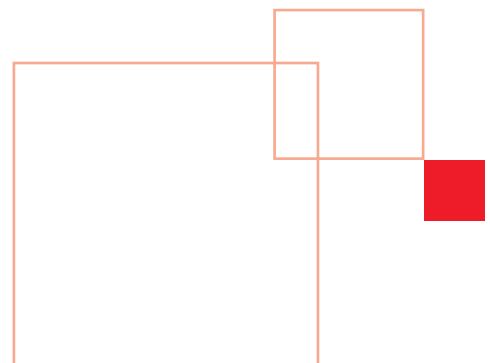

- Ceiling gaps between doors, windows, roller shutters and adjacent structural elements
- Filling cavities within junctions
- Closing building joints

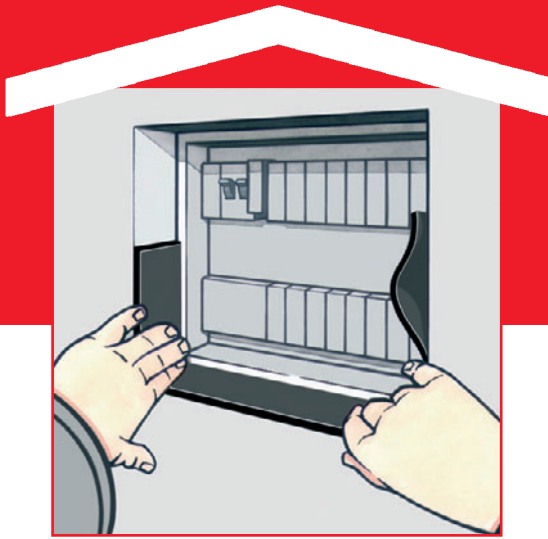

In the event of a fire, AESTUVER intumescent strip expands. This prevents fire and smoke from passing through gaps and openings between or inside factory-made, prefabricated elements of fire-resistant structures and special structural elements.

AESTUVER intumescent strip is generally used in construction details, structures or other products and represents an essential component of fire protection systems, offering simple fire protection solutions.

Technical details

License number	Z-19.11-1915 (product license)
Processing	The strip dimensions must fit the size of the gap/opening and meet the requirements regarding fire protection and must be protected against mechanical loads
Building material class	DIN 4102-B2
Specific weight	1.3 kg/dm ³
Expansion volume	> 30-fold
Expansion pressure	≥ 0.8 N/mm ²
Colour	Graphite grey/black
Property	Self-adhesive on one side
Storage	Dry, protect against UV rays

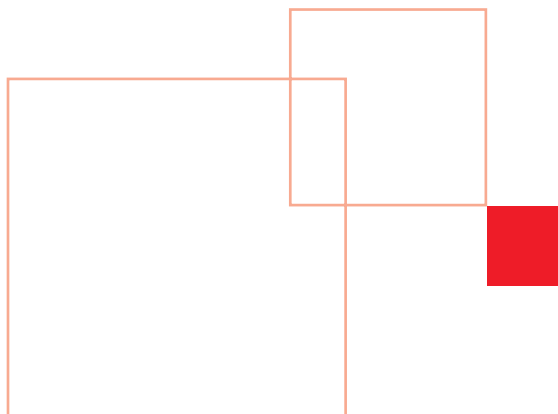

Retailer information

Product name	10/1.5	20/1.5	30/1.5	40/1.5	50/1.5	xx/1.5
Article number	8062001	8062002	8062003	8062004	8062005	8062006
EAN- number	4007548010825	4007548010832	4007548010849	4007548010856	4007548010863	4007548010870
Format	10 mm x 1.5 mm	20 mm x 1.5 mm	30 mm x 1.5 mm	40 mm x 1.5 mm	50 mm x 1.5 mm	Widths up to 300 mm upon request
Trading unit size	25 m	25 m	25 m	25 m	25 m	25 m
Trading unit/ Packaging	25 rolls/box	15 rolls/box	10 rolls/box	7 rolls/box	6 rolls/box	Minimum purchase: 100 m

Safety precautions:

Keep away from children.
